

99 - Spanish Spade Bit

Last Updated Monday, 14 September 2009 23:36

(Shown on 47 cheek, also available with 51 cheek)

Made for the well trained horse and expert horseman. Curved mouthpiece to fit comfortably. Spoon provides constant contact with horses palate. Wire braces enable bit to sit lower in mouth while maintaining contact with corners of mouth and preventing horse putting tongue over mouthpiece. With properly trained horse, the rider will have fingertip control.
