

Design your own bit.

1- Pick out a Mouth Piece

2- Pick out a [Cheek Piece](#)

3- Get a [Price Quote](#)

Now you have the ability to be different from everyone else. Design a bit that no one else will have. Please your horse, not mention yourself !!

Most all bits, with a few exceptions, are available in the Cheek Pieces that are shown in step #2.

We will custom make up any Mouth Piece / Cheek Piece combination that you need. Special orders will take a few days extra to manufacture.

Feel free to [e-mail](#) us for more details.

192 - Training Snaffle

An old and proven idea that has been used by expert trainers for years. For starting colts it gives more control than a plain snaffle.

192SW - Single Twisted Wire Snaffle

Mouthpieces offset to give horseman the opportunity to work with different pressure points in horses mouth than the 192 Trail file.

192DW - Double Twisted Wire Snaffle

Mouthpieces offset to give horseman the opportunity to work with different pressure points. Less severe than the 192SW.

268 - Ported Snaffle

□ The best all around bit. Gives horseman opportunity snaffle or curb pressure.

H77T - Hinged Snaffle

Hinge action gives horseman more lateral control by working off corners of mouth.

123L - Low Port Curb

Provides considerable tongue room while applying pressure to palate and roof of

65 - Medium Port Curb

Provides medium tongue relief equalizing pressure e, bars, and soft approach to palate.

123H - High Port Curb

Provides considerable tongue room while applying

1. When rein is u

95 - Tongue Relief

Provides extra tongue pressure relief. Applies palate pressure and rotates touching down on bars when

71 - Polo Bit

Provides ample room for horses tongue (mullen relief). Available ONLY in Sweet Iron.

95 - Tongue Release Bit

Provides extra tongue pressure relief. Applies pal:  e and rotates touching down on bars when

123L - Low Port Curb

Provides considerable tongue room while applying pressure to palate and roof of mouth. When rein is u

65C - Low Port with Cricket

Works on lower portion of horses mouth. When hc  s cricket into play, it relaxes horses lower jaw

51HCC - Copper Covered with Cricket

Copper cover provides contact with horses palate. When horse brings cricket into play, it relaxes horses

123HC - High Port with Cricket

Applies palate pressure when rein is used. When horse brings cricket into play, it relaxes horses lower jaw.

CC65C - High Port Copper Covered with Cricket

Works on lower portion of horses mouth. Copper covered mouthpiece provides contact with horses palate. When rein is used, it applies pressure to the lower jaw.

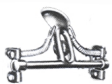

75XHC - Extra High Curb with Cricket

Adds extra palate pressure plus providing medium relief when rein is used. When horse brings cricket into play, it relaxes horses lower jaw.

82 - Half Breed with Cricket

Medium port with cricket applying pressure to palate, providing ample room for horses tongue (mullen reined).

99 - Loose Jaw Spanish Spade

Made for the well trained horse and expert horseman. Wire braces enable bit to sit lower in mouth while still applying pressure to the palate.

Hundreds of different combinations are possible.
